JULIO CESAR YAÑEZ MEJIA

Full Stack Software Engineer | React | TypeScript | Node.js | Python

Phone: +52 722 182 8896 | Email: jcesary06@gmail.com
LinkedIn: linkedin.com/in/jcesar206 | GitHub: github.com/JCesar206 | Portfolio: julioym.asteroi.dev

PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with hands-on experience building, testing, and maintaining scalable web applications and RESTful services using TypeScript, ReactJS, Next.js, Node.js, and Python. Proficient in relational database management (MySQL, PostgreSQL), version control with Git, and implementing modern API architectures. Strong advocate for code quality, clear technical documentation, and web security standards (OWASP). Experienced in remote collaboration and cross-functional teamwork, aligned with US business hours. Upper-Intermediate English proficiency (B2).

TECHNICAL SKILLS

- **Frontend:** React, Vue.js, HTML5, CSS3, Tailwind CSS
- **Languages:** JavaScript, TypeScript, Java
- **Tools:** Git, GitHub, GitHub Actions, Vite, Axios, Postman
- **Backend:** Node.js, Express.js, REST APIs, Spring Boot
- **Databases:** MySQL, PostgreSQL
- **Cloud & DevOps:** CI/CD, Azure, Render, GitHub Pages
- **Security:** JWT, bcrypt, Authentication, OWASP Basics

PROFESSIONAL EXPERIENCE

Full Stack Web Developer — AsteroiDev (Full Stack Projects)

Lerma de Villada, México | Feb 2025 – Sep 2026

- Designed, developed and deployed RESTful web applications using React, Node.js and MySQL.
- Built responsive and accessible interfaces with Tailwind CSS.
- Developed backend APIs, database integrations and authentication flows.
- Managed deployments, Git-based workflows and CI/CD pipelines using GitHub Actions and Azure.
- Applied secure development and cybersecurity best practices.

Helpdesk & Web Systems Specialist - Banorte - Through the consultancy firm Inetum (Mexico City) — Afore XXI Banorte

San Mateo Atenco, México | Nov 2024 – Feb 2025

- Built and maintained web-based internal tools using TypeScript, React, and Python/Express to automate call logging and
- reporting workflows.
- Executed end-to-end testing (unit and integration tests) on newly developed web features before deploying patches to
- staging and production environments.
- Optimized relational database queries and maintained data integrity between call center management software and
- internal reporting servers.

Operations Automation & Junior Web Developer | Call Center / Helpdesk - Inbursa - Through the consultancy firm Inetum (Mexico City) — Seguros Inbursa

Toluca, México | May 2024 – Jul 2024

- Developed and deployed custom web modules and internal forms using HTML5, CSS3, Tailwind CSS, and JavaScript to
- streamline internal technical ticket logging.
- Investigated, debugged, and resolved front-end and back-end application defects reported by frontline call center agents.
- Authored clear technical documentation, API integration guides, and system release notes for cross-functional teams and
- system administrators.

Helpdesk & Web Systems Specialist - Atento - Through the consultancy firm Inetum (Mexico City) — Atento

Toluca, México | Oct 2023 – Apr 2024

- Developed and deployed custom web modules and internal forms using HTML5, CSS3, Tailwind CSS, and JavaScript to
- streamline internal technical ticket logging.
- Investigated, debugged, and resolved front-end and back-end application defects reported by frontline call center agents.
- Managed deployment releases for internal web tools using Git/GitHub, performing version control and regression testing
- prior to production launches.

IT Support & Internal Web Developer | Customer Operations / BPO | CitiBanamex SA de CV (Metepec, Edo. Mex.) — CitiBanamex

Metepec, México | Jul 2017 – Aug 2023

- Engineered and maintained internal web-based dashboards using React, JavaScript (ES6+), and Node.js to track
- real-time agent metrics and ticketing volume.
- Designed, tested, and deployed regular software updates and feature enhancements to internal CRM and helpdesk tools,
- ensuring 99.8% system uptime.
- Integrated RESTful APIs and SQL databases (MySQL/PostgreSQL) to automate customer data retrieval, reducing
- average handle time (AHT) across operations.
- Configured CI/CD deployment pipelines via GitHub Actions to deliver smooth, zero-downtime updates to internal web
- applications.
- Troubleshot, debugged, and refactored legacy internal codebases, improving web application loading speeds and user
- experience for 50+ daily active users.

PROJECTS

DevShop — Full Stack E-commerce Application

Full-stack e-commerce application built with React, Node.js, Express.js and MySQL. Implemented JWT authentication, shopping cart, admin dashboard, image uploading, multi-language support and responsive UI. Deployed on GitHub Pages and Render.

Technologies: React, Tailwind CSS, Axios, Node.js, Express.js, MySQL, JWT, Git, GitHub

Crazy Note — Full Stack Notes Application

Notes application to create, update and manage notes, add emojis and mark notes as favorites or completed. React frontend connected to a Node.js and Express.js backend with PostgreSQL integration and JWT authentication.

Technologies: React, Tailwind CSS, Axios, Node.js, Express.js, PostgreSQL, JWT

Password Manager

Web application to manage usernames and passwords locally, with a responsive and simple user interface.

Technologies: React, Tailwind CSS

Code and demos: github.com/JCesar206 | julioym.asteroi.dev

EDUCATION

Bachelor's Degree in Administrative Informatics — Universidad Insurgentes, Naucalpan, Estado de México | 2007 – 2010

CERTIFICATIONS

- Introduction to Cybersecurity — Cisco
- Cyber Threat Management — Cisco

LANGUAGES

English — Intermediate-Upper (B2+) | Spanish — Native
